Debra Hardman  
Acting Commissioner

September 4, 2014

The attached report represents a consolidation of Reports of Condition and Income filed by state-chartered banks with the Missouri Division of Finance as of June 30, 2014, and a comparison with the statements filed one year earlier. Also included is a comparison of financial statements of state-chartered and national banks.

During the previous twelve months, the number of state-chartered banks and trust companies remained the same at 262; however, there have been two mergers and two charter conversions. Over the past twelve months two banks merged into other institutions, and a national bank and a state thrift converted to state-chartered banks.

Assets in state-chartered banks are at an all time high totaling \$100.4 billion on June 30, 2014, an increase of 3.8 percent from one year earlier. Deposits were \$83.7 billion and total loans were \$60.6 billion on June 30, 2014, an increase of 3.5 percent and 8.0 percent from one year earlier, respectively. Collectively, Missouri state-chartered banks maintain a higher percentage of total assets in loans than the population of all FDIC-insured banks. The average loan to asset ratio in Missouri is 60.32 percent compared to 53.48 for all FDIC-insured banks.

The overall condition of Missouri state-chartered banks continued to improve in the second quarter. The attached graphs illustrate improvement in several component areas. The return on assets remains above one percent and continues to show signs of stabilization, despite a compressed net interest margin. The median return on assets for state-chartered banks is 0.94 percent as of June 30, 2014.

Capital remains strong as Tier 1 Leverage Capital is 9.72 percent of total assets, with the national average being 9.57 percent.
